I am moving and cannot fit my futon, so I would like to try to make some of the money back on it. I bought it for 500 in November of 2018 and would like to get at least 100 back, as it is still in good condition, as the only issue is that the cloth on the bottom of the cushion, inside the futon, is slightly torn, revealing the inside of the cushion when you open the storage space. The futon is black with cushioned arms which can be taken off and stored inside of the futon in a large storage space under the cushions. I need to move by the 23rd or I will have to find a way to donate it.
